

1. Replace relay on the left side of the board with a 24V 16A SPDT (ERM1C16-24) as in picture 3
2. Replace resistor Next to charge voltage pot with a 1/4w 3K 1% resistor as shown in pictures 4 and 5
3. Fit Zener diode 11V 1W5% D041 on the back of the board as shown in the pictures 1 and 2
